ABOUT ALTRATA

Altrata is a global leader in people intelligence. It includes more than 100 million profiles on wealthy individuals from around the world and more than 12 million profiles on senior decision makers, board members and c-suite leaders. Altrata provides intelligence on the people who are most impactful to our clients' success.

Advanced integration solutions allow deeper insights and access to billions of connections helping clients close more deals, manage risk, and identify up and coming talent quickly. Our data is actionable, accurate, and comprehensive. Powered by a global team of more than 400 researchers who are committed to maintaining millions of profiles and changing data points, so you can effectively engage and make meaningful, lasting connections.

Altrata™ is a registered trademark of the Euromoney Group comprised of five distinct offerings: BoardEx, Boardroom Insiders, RelSci, WealthEngine, and Wealth-X.

ABOUT EUROMONEY

Euromoney Institutional Investor PLC (www.euromoneyplc.com) is an international business information group listed on the stock exchange and is a member of the FTSE 250 share index. Euromoney's group of businesses covers asset management, price discovery, data and market intelligence, under brands including, Euromoney, Institutional Investor, BCA Research, Ned Davis Research and Fastmarkets. Euromoney also runs an extensive portfolio of large-scale events. Euromoney has revenues of around £400m, a market cap of about £1.2bn and approximately 1600 employees.

Euromoney is known for its entrepreneurial culture – Euromoney people are creative, action-oriented, close to customers, passionate about their brands, knowledgeable about the industries they serve and accountable for their results. The company aims for what it calls “the best of both worlds” – complementing these entrepreneurial characteristics with the benefits that come from being a sizeable company; for example, taking advantage of Euromoney's scale, sharing best practice, operating strategically and creating career paths for staff across the whole company. Strong central functions alongside the business divisions are essential for this.

The company headquarters are in London, with additional main offices in New York, Montreal, Hong Kong, Singapore, Malaysia, India and Shanghai. The group has a further 20 offices around the world.

1. JOB PURPOSE

The front end Engineer will work within an agile team, building enterprise grade software systems using Node and TypeScript.

As an Engineer you are expected to adhere to development standards, engage in peer review of code across the team and work closely with Business Analysts and Software QA Engineers to deliver high quality software. You are encouraged to be actively involved in the DevOps processes and take responsibility for the code and infrastructure you deploy.

The successful candidate should have a keen desire to keep on top of the ever-updating tech curve, and a drive to continuously hone their craft.

2. KEY RESPONSIBILITIES

- Adhere to development standards defined by your team leader to ensure you write high quality software.
- Continue to strengthen your skills by completing personal development objectives and keeping up to date with emerging technologies and techniques
- Analyze stories written by business analysts and translate them into features and services.
- Work within and contribute to the agile practises of your team, taking an active part in estimation and planning sessions and sprint retrospectives
- Contribute to the Altrata culture that makes Altrata a great place to work and attractive to the best talent.

3. KEY INTERFACES

- QA, Business Analysts & Product Owners
 - Data & Platform engineering teams
 - Architects
 - CloudOps
 - UX, design agencies, consultants.
-

4. KNOWLEDGE, EXPERIENCE AND SKILLS

- Computer science / scientific degree or equivalent professional experience.
- Some level of professional working experience. More if no relevant degree.
- Hands-on experience in HTML, CSS, and React. Knowledge of creating clean, reusable web components.
- Experience with TypeScript / JavaScript
- OO and functional programming experience, design patterns, SOLID principles.
- Awareness of unit testing practices with Jest or equivalent is a positive.
- Source Control – Git, SVN or equivalent.
- Experience with scrum, Pull Requests, Continuous Integration & Delivery.
- Some hands-on experience with npm, project and bundling configuration is a plus.
- Knowledge of Next.js is nice to have.

We offer fully remote working (within the country) as well as a 4.5 day work week – Friday afternoons are off!

Altrata is actively committed to promoting, fostering, and nurturing a diverse and inclusive environment, and all applicants will receive equal consideration regardless of race, sex, religion, color, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status. We recognize that these types of statements appear often in job descriptions. At Altrata, we really and truly mean it.
